Car Requirements

Our goal is to give spectators the opportunity to learn what racing looked like 100 years ago. To participate in our events:

- All cars - must be no newer than 1920 and must be an authentic race car or an exact recreation of a race car from that period.
- Cars must be restored or preserved as they would have looked in the period up to 1920 with no parts or modifications that weren't available on cars during that period.
- Exceptions for components that are no longer available are occasionally made.
- No modern graphics or advertisements are allowed.
- Cars must be able to safely maintain minimum speeds of 55 mph
